Subject: SI and H Experimentation, 14 July 1953.

On 14 July 1953, Tuesday, SI and H experimentation and research was carried on by [redacted] and [redacted] with [redacted] subjects in Building 13, Room 20.

The evening's work was started by repeating some tests of suggestibility. One test was following a line and circle with a ring on a string and falling back.

A

Using different methods of induction, [redacted] worked with [redacted] She quickly went under and after performing some sensory tests, she was able to open her eyes, speak and walk. She was also given a PH.

[redacted] worked with [redacted] and was able to induce a medium stage of trance. In the backward and forward test, [redacted] showed some resistance and tenseness.

Then [redacted] put [redacted] in a medium trance and used the PH on [redacted] with both of them asleep he attempted a chain PH. [redacted] however, did not follow through until requested to do so and then [redacted] responded to the PH. They were both put under again and reassured. Finally, [redacted] worked with [redacted] but was unable to achieve a desirable depth and after suggestions for future work she was awakened.

Both [redacted] now go under quite easily and are able to achieve somnambulistic stages so that much more work can be done in the future with these two.
